Centerline Homes™ Plan-It™ program is a complete home customization process that allows home buyers the opportunity to customize a home to better meet their needs. Once enrolled in the Plan-It™ program, homeowners will meet with an architect to design and customize their new home.

Floor plans are artfully designed to appeal to each individual's desire for beauty, personal style and function.

PLAN-IT™ DESIGN SERVICES INCLUDE:

- Personal meetings with an architect to lay out your custom home design.
- Computer aided drafting and design (C.A.D.D.) services to provide you with drawings of your customized design changes.
- An overview of all costs associated with your custom design changes.
- Centerline's Plan-It™ program is available in select communities and subject to change. Please ask your new home consultant for details.
